

## **Functional Foods and Creativity**

SHUICHI KAMINOGAWA, Ph.D.

Professor, Nihon University

Professor Emeritus, The University of Tokyo

Vice President, ILSI Japan

### **< Summary >**

The concept of functional food originated in Japan. This article introduces various theories proposed on food and health in association with the functionality of functional food and describes its creativity compared to these theories. In addition, the authors wish to present their recent ideas on assessment methods for the functionality, its safety, a need to establish assessment methods specific to functional food, etc.
